

Tsawwassen Landing Lutron Radio RA2 Lighting System

What is the Lutron Radio RA2 Lighting System?

Lutron Radio RA2 is a home automation system that is flexible, scalable and reliable. Using Lutron's patented Clear Connect RF technology, you can trust that your system will work with precision and accuracy every time you use it. Choose from a variety of wireless components to customize and expand your system from a single room to your whole Home including but not limited to, lighting, shades, drapes and temperature control.

What your Lutron Radio RA2 system includes?

Depending on the configuration of your floor plan, your system includes a Main Repeater (home automation controller), 6 Button Hybrid Keypads and switches. They have been installed in most common areas on the main floor to control, Kitchen, hallway, dining room, family room & front porch light.

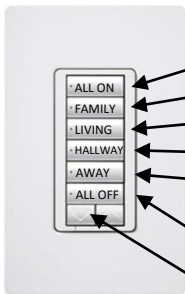

Porch Light Timeclock

Please do note that your Front Porch Light has been programmed to turn on at sunset everyday and turn off at midnight everyday. Daylight savings time will adjust the clock automatically for spring and fall.

6 Button Keypad Operation

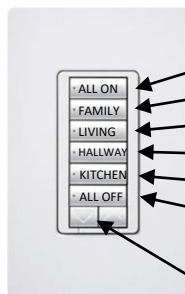

Typical button layout (Configuration may differ slightly depending on your floor plan)

Foyer Keypad

- Single Scene button that will turn on all lights that are controlled by Lutron
- Toggle button that will turn on with a press and off with a second press
- Toggle button that will turn on with a press and off with a second press
- Toggle button that will turn on with a press and off with a second press
- Toggle button that will turn on with a press and off with a second press
- Timeclock button that will activate Away or Vacation mode when pressed. While away, lighting will mimic functions as if you were home, turning on/off lights as the system learns your habits. To disable simply press button again
- Single Scene button that will turn off all the lights that are controlled by Lutron
- Dim Up & Dim Down Buttons can be used on any toggle button that has been pressed which will dim up or down the area selected. These two buttons will always dim up or down the last toggle button/area selected and will only dim that area if a Lutron dimmer was installed.
